perpendicular lines

 $m =$

 $m =$

 $m =$

 $m =$

Fill in the blanks:

$$\square \times 7 = -1$$

$$-\frac{1}{2} \times \square = -1$$

$$5 \times \frac{-1}{5} = \square$$

Line A is $3y = 2x + 6$

Line B is $x - \frac{7}{3} = y$

Are these lines perpendicular? Explain your answer.
