## estimate

By rounding each number to the nearest integer, find estimates to the calculations:

$$1) 32 + 4.7 =$$

$$2) 7.3 + 84 =$$

$$3) 29 \times 1.7 =$$

$$4) 10.3 - 2.1 =$$

**HINT**  
integer =  
whole number

Estimate the following by rounding the numbers to 1 significant figure.

$$5) 623 \times 6.2 =$$

$$6) 172 \times 8.9 =$$

$$7) 10.7 \div 20.3 =$$

$$8) \frac{323}{111} =$$

$$9) 727 + 1073 =$$

$$10) 10.23^3 =$$
